

No unnecessary distractions: trouble-free IT

At CSF we believe technology should function as it was designed to: to make things less complicated, more cost-effective and altogether more agreeable.

Together we can put the flow back into your IT.

SeWo® / Secured Virtual Workplace

Our virtual workplaces are characterized by particularly high security standards, which is why they are called SeWo: secured workplaces. You can use a secured virtual workplace at any time and from almost anywhere. The fact that we only operate secured workplaces using ISO 27001-certified data centers with three-tier architecture is the decisive factor for their high standard of security.

Why customers use SeWo® virtual secured workplace

Because:

- Flexibility and high data security.
- Work wherever you are regardless of the device or operating system.
- Collaboration has never been so easy.
- Clear cost control.
- Maximum security and automatic backups.

Focus on your area of competence.

- More time for the essentials.
- Collaboration has never been so easy.
- Work from wherever i am.

Short ramp up time in about few hours.

High flexibility in every day life.

- Flexible, safe and fast
- Additional workplaces are ready in no time.
- A transfer platform ensures secure data exchange.

Immediate ROI because no investments are needed.

Maximum security and transparent cost control.
