Technology that is tailored to your requirements, how easy it is to expand with flexibility and high security and clear cost control, regardless of which industry you are in.

Challenges

- Need to work from everywhere
- Need for a secured environment
- Need for flexibility in growing
- Need for cost control

Changes in the world of work

- Bring your own device
- Working from home
- Growing security requirements
- Teamwork and collaboration

Ideal Solution

- Support of working from home
- Easy and quick boarding of new employees
- Have all data in a secured environment (ISO27001)

- Existent old IT infrastructure on premise with reduced possibilities.
- Fluctuating needs on IT services
- Start with IT services out of the cloud in a hybrid mode.

Desired Outcomes

- We need a flexible solution for our fast growing company.
- Today there are more than 35 company on the platform and still growing.
- They benefit from trouble-free IT

No need to own IT Infrastructure on premise. Flexible growing as needed is supported. New workspace models are fully supported.

"SeWo® gives us flexibility in everyday life. This allows us to work from home without any problems and without losing data security. And thanks to SeWo® from CSF, we don't need our own server structures."

SeWo®, always and everywhere a secure and professional IT infrastructure
